

This is a freeware font. I developed this font for transliteration purposes. I always wanted a font that was sleek and classical. I have always liked this font. When I got my hands on The Fontographer program that comes with Macromedia package. I was a happy camper. Further there is included in the fonts the famous Islamic prayers. These includes the peace and blessings on the Prophet ﷺ , the Prophets ﷺ in general, the May Allah be pleased with the companion ﷺ, companions ﷺ and a she companion ﷺ (this is a hard to find, so I created it). I have always liked the way that the Yemenis always included alihee (the Prophet's family. ﷺ) So I have created it the font. Included in this document is the scheme for transliteration. « » This is the double brackets used in Arabic quite a bit.

Included also is the brackets for the aya's ﴿﴾
Some other stuff that is included is:

Allah's Name: **الله**

In the Name of Allah...: **بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ**

Honored and above: **وَعَبَّكَ**

High above: **حَمْدًا**

God is Great: **الله أكبر**

Holiday greeting: **كافة العباد**

 The nice moon and crescent shapes

There is one more document included in this package and that is the standard transliteration system of Oxford University Press. This was used for the translation of Tabari's Tafseer. I hope that they are useful.

Enjoy and May God bless...Muhammad
